

IAEA Support

Last Updated Wednesday, 24 June 2009

Under the auspices of the IAEA, nationally developed Underground Research Facilities (URFs) and associated laboratories are being offered for use by other nations. The URFs and laboratories form a "Network of Centres of Excellence" for training in and development of waste disposal technologies. If your organisation is from a participating country in the IAEA training network scheme you may be able to request financial support from the IAEA for courses run as part of the Network scheme.

Some of our courses are supported by the International Atomic Energy Agency. If your organisation is from a participating country in the IAEA Network of Centres of Excellence for Training in and Demonstration of Waste Disposal Technologies in Underground Research Facilities (the Network) you may be able to request financial support from the IAEA (note: this is ONLY for courses run as part of the Network scheme). Currently, the countries participating in the IAEA Network are: Argentina, Armenia, Brazil, Bulgaria, Chile, China, Croatia, Czech Republic, India, Lithuania, Kazakstan, Mexico, Pakistan, Philippines, Republic of Korea, Romania, South Africa, Russian Federation, Slovakia, Slovenia and Ukraine. Please contact the following responsible officer at the IAEA:

Paul Degnan

Waste Technology Section

Division of Nuclear Fuel Cycle and Waste Technology

International Atomic Energy Agency

Wagramer Strasse 5, P.O. Box 100, 1400 Vienna, Austria

E-Mail: P.Degnan@iaea.org

IAEA Network: http://www.iaea.org/OurWork/ST/NE/NEFW/wts_network.html

Contacts

Should participants have any questions about the course details, please contact Gabi Vonlanthen (e-mail gabi.vonlanthen@itc-school.org) who will also answer enquires and deal with special requirements that participants may have.
